

Nima Ghorbani

✉ nima.ghorhani@gmail.com 📍 Ulm, Germany 🌐 [nghorhani](#) 📄 [nghorhani](#) ✕ [n__ghorhani](#)

Education

Eberhard Karls University of Tübingen , Neural Information Processing	Tübingen, Germany 2015 – 2017
Tabriz Azad University , Electrical Engineering, Electronics	Tabriz, Iran 2008 – 2012

Experience

Cubert Hyperspectral (Cubert GmbH) , Principal AI Architect Focus on AI frameworks, agentic tools, and scalable data-processing systems for hyperspectral imaging and industrial computer vision. Bridge advanced sensor data with modern AI workflows, including modular processing pipelines, machine-learning integration, natural-language analysis of visual and spectral data, and production-oriented systems for real-world industrial applications.	Ulm, Germany (On-site) Oct 2025 – present 1 year
Sporttotal Technology GmbH , Head of Artificial Intelligence Developed AI-powered systems for fully automated sports broadcasting, immersive content generation, and advanced sports analytics. Work spanned real-time object detection and tracking on edge devices, human pose estimation, 3D body reconstruction, and identity tracking for sports productions. Additionally contributed to texture generation from sparse image samples using optimization techniques and diffusion-based inpainting, enabling high-fidelity 3D game reconstructions and interactive viewing experiences.	Berlin, Germany (Remote) Sept 2024 – Sept 2025 1 year 1 month
Sporttotal Technology GmbH , Principal Computer Vision Engineer	Berlin, Germany (Remote) Mar 2023 – Sept 2024 1 year 7 months
Kaia Health Software GmbH , Staff Applied Research Scientist Kaia Health is a digital therapeutics company that leverages AI-powered computer vision to deliver real-time, personalized musculoskeletal care through a smartphone camera. Researched and developed core ML models for 3D human pose estimation, motion analysis, and real-time feedback generation, enabling accurate human body tracking and automated movement assessments without wearable sensors.	Munich, Germany (Remote) Apr 2022 – Feb 2023 11 months
Max Planck Institute for Intelligent Systems , Research Software Engineer, Digital Humans in Motion Perceiving Systems Department (Prof. Michael Black). Contributed to the development of foundational human body models and large-scale datasets that have significantly advanced the fields of 3D human reconstruction and motion analysis. Worked on SMPL-X (expressive human body model) and AMASS (dataset unifying marker-based motion capture with parametric body models for large-scale learning). Helped develop VPoser, a body pose prior for robust 2D-to-3D human lifting in SMPLify-X. Also contributed to GRAB (a generative model for human grasping) and SOMA (a framework for synthetic data generation for human-object interaction understanding).	Tübingen, Germany Feb 2018 – Mar 2022 4 years 1 month

SuperPipe International Co., Software Engineer, ERP Development and Implementation (Odoo)

Led a team of two engineers to implement an open-source ERP (Odoo) at SPI, on a Python / PostgreSQL / HTML+CSS stack. Worked closely with finance, HR, warehouse, and inventory teams to integrate their processes into the ERP, supervised by the operational processes department to ensure industry standards were adapted and integrated for the best implementation impact.

Tehran, Iran
Apr 2013 – Mar 2015
2 years
